DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the essential difference from the prior art are the steps of comparing facial photographic data and name data to stored data in order to automatically assign an entry clearance status value; comparing data regarding the purpose of the visit to stored data in order to assign another entry clearance status value, and comparing the entry clearance status values against known values to generate a printed document containing the visitor's photo ID and parameters of entry based on the comparison. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Piosenka et al. U.S. Patent No. 4,993,068 discloses an access control method that utilizes multiple biometric data including facial photo and an ID document to identify a visitor.

Art Unit: 2623

b. Marchoili et al. U.S. Patent No. 6,233,588 discloses an access control method for controlling access to multiple regions that includes the step of changing access control information within the regions.
